Pawel,

I do not have any chlorinate perfluorinated compounds to share. Most of the new compounds we have obtained are perfluorinated ether compounds. There are however very few available that are exactly what we have found. Here is a paper of what we have found and some standards we have obtained as surrogates.

Mark

Hi Mark,

I hope you are fine. It was good to meet you in Ascona. Referring to our chat about the standards of perfluorinated compounds and that you could possibly share.
Do you have any chlorinated perfluorinated compounds?

Best regards,

Pawel
